Fitech Laboratories, Inc. announces the immediate availability of xTier 2.1 for Java

FOR IMMEDIATE RELEASE

San Francisco, CA – June 14, 2004 – Fitech Laboratories Inc., announced today the availability of xTier™ 2.1 for Java, the latest release of Fitech Laboratories' innovative Java and .NET Middleware Components. Building upon the 22 services designed to augment and extend the J2EE specification to speed the development of enterprise applications contained in xTier™ 2.0 for Java, the version 2.1 release adds support for all of the leading application servers and Integrated Development Environments (IDEs).

xTier™ 2.1 provides direct support for the following Application Servers:

- BEA Weblogic 7 Application Server
- BEA Weblogic 8 Application Server
- IBM WebSphere 5 Application Server
- Oracle Application Server 9i
- Oracle Application Server 10g
- JBoss 3 Application Server
- JBoss 4 Application Server
- SunOne 8 Application Server

xTier™ 2.1 provides direct support for the following development tools:

- Eclipse 2
- Eclipse 3
- JBuilder 9
- IntelliJ 4
- NetBeans 3
- Oracle JDeveloper 10g

- Oracle JDeveloper 9i

xTier™ 2.1 for Java provides 22 components for enterprise Java development implemented using the principles of Inversion of Control (IoC) and Service Oriented Design (SOD). The components can be purchased in a “mix-and-match” fashion as developers can “choose-their-own” middleware consisting of a single service, several, or all of the xTier™ services as the technical requirements of the application dictate. The components include a Grid Computing component, an Object Caching component, an Embedded Workflow component, a high-speed Object Marshalling (Serialization) component, a hierarchical Configuration Management component, and a Job Scheduling component along with 16 additional high-value services. For more information please refer to http://www.fitechlabs.com/products_xtier_overview.jsp.

Availability

xTier™ 2.1 for Java has been released for the Windows, Solaris and Linux platforms and is available immediately at: <http://www.fitechlabs.com/>

About Fitech Laboratories, Inc.

Fitech Laboratories, Inc. is a leading provider of next generation software components and middleware technologies. By combining industry standards, service-oriented development expertise and the latest technologies, Fitech Laboratories, Inc. enables organizations to drastically reduce development time and Total Cost of Ownership (TCO), while benefiting from a highly extensible, fast and reliable software infrastructure.
